PROFESSIONAL SUMMARY

Computer Science undergraduate with technical expertise in full-stack web architectures, AI integrations, and cloud infrastructure. Highly skilled in deploying containerized applications utilizing Docker, Kubernetes, and AWS, supported by automated CI/CD workflows. Actively targeting Software Engineering and DevOps roles to architect and scale reliable, high-performance distributed systems.

EXPERIENCE

Software Engineering Intern — Reverblunt Pvt Ltd (Blogy.in)

Apr 2026 – Present

- Spearheaded the end-to-end architecture and development of an automated AI SEO toolkit, taking full technical ownership of a programmatic API infrastructure.
- Engineered a scalable, cloud-native microservices architecture (Node.js, PostgreSQL, Redis) that powers a highly concurrent BullMQ data pipeline, automating complex AI workflows—including large-scale web scraping, content categorization, and intelligent deduplication—optimized for seamless AWS deployment.

TECHNICAL SKILLS

- **Programming Languages:** C++, Java, JavaScript, Python
- **Databases & Storage Systems:** MySQL, MongoDB, Postgres
- **Web Frameworks & Technologies:** ReactJS, Next.js, Vite, ExpressJS, NodeJS
- **Deployment & Cloud Infrastructure:** Docker, Kubernetes, Jenkins, GitHub Actions, Ansible, Terraform, AWS
- **General Tools:** GitHub, GitLab, Linux, WordPress, Jira

PROJECTS

Multi-Container App with Blue-Green Deployment

Jan 2026 – Feb 2026

| Docker, Nginx, MongoDB, CI/CD

- Architected and containerised a full-stack application (Node.js, React, MongoDB) using Docker Compose, enabling cloud-native, environment-consistent deployments across development and production.
- Implemented Blue-Green deployment strategy with Nginx reverse proxy, achieving zero-downtime releases and 99.9% availability during version rollouts.
- Built an automated CI/CD pipeline with Docker volumes for data persistence, enabling reliable production releases on AWS EC2.

CogniSpace– Cloud-Native Generative AI SaaS Platform

April 2026 – Present

| React, Node.js, Kubernetes, AWS, GitHub Actions

- Engineered a unified SaaS platform replacing disconnected tools with a centralized workspace for team chat, project boards, and document management, integrating a custom RAG pipeline (Pinecone) for context-aware querying of private PDFs.
- Architected multi-modal Google Gemini workflows via SSE for real-time AI assistance; implemented a Redis cache to bypass redundant LLM calls, reducing latency by 90%.
- Provisioned a highly available AWS Kubernetes cluster, establishing an automated CI/CD pipeline via GitHub Actions for zero-downtime microservice deployments with NGINX Ingress and Cert-Manager to automate secure SSL traffic routing.

EDUCATION

Vellore Institute Of Technology

Bachelor of Technology in Computer Science and Engineering - 8.48/10

Sep 2023 – Present

Madhya Pradesh, India

CERTIFICATIONS

- AWS Solutions Architect – Associate
- Udemy Decoding DevOps
